

my express

Giving you the
freedom to
design your
own protein
substitute

express gives you complete control over your protein substitute.

You can make it how **YOU** like - as a paste, a mini drink or a flexi drink.

Paste:

a few spoonfuls and it's gone – ideal if you have moved on from gel and prefer a spoonable consistency. Add 10-20ml of water to an express sachet.

Mini Drink:

quick to drink – great when you want to take it quickly in one go. Add 80-100ml of water to an express sachet.

Flexi Drink:

make it exactly how you like it – you have complete freedom over how your protein substitute tastes. Add as much water as desired to an express sachet.

Mix it up with my express shakes

my express shakes are a great way to put you back in control of your protein substitute. You can design your perfect drink choosing your own flavours to make it taste how you prefer. We've included some great tasting, easy ideas for you to try. Plus, there's a space to add in your own express shake ideas.

my express recipes are easy to make, simply shake it up!

1. Empty the express sachet into a shaker
(add in a **flavour pac** if required)
2. Add in any other powder ingredients
3. Now add in the liquid ingredients
4. Shake it up and drink!

If you are using unflavoured express simply add in a **flavour pac** to create the flavoured version that is used in the recipes.

my express shakes and mocktail recipes are tried and tested so you know they will taste great. They are designed to give you inspiration; you can make your own **my express** shakes by adding any permitted ingredients you prefer to make your perfect protein substitute.

my express shakes

An illustration for the Apple Fresh shake featuring a large apple core with a straw, three heart-shaped suns, and an umbrella.

Apple Fresh

INGREDIENTS
